FIGURE 4

FIGURE 5

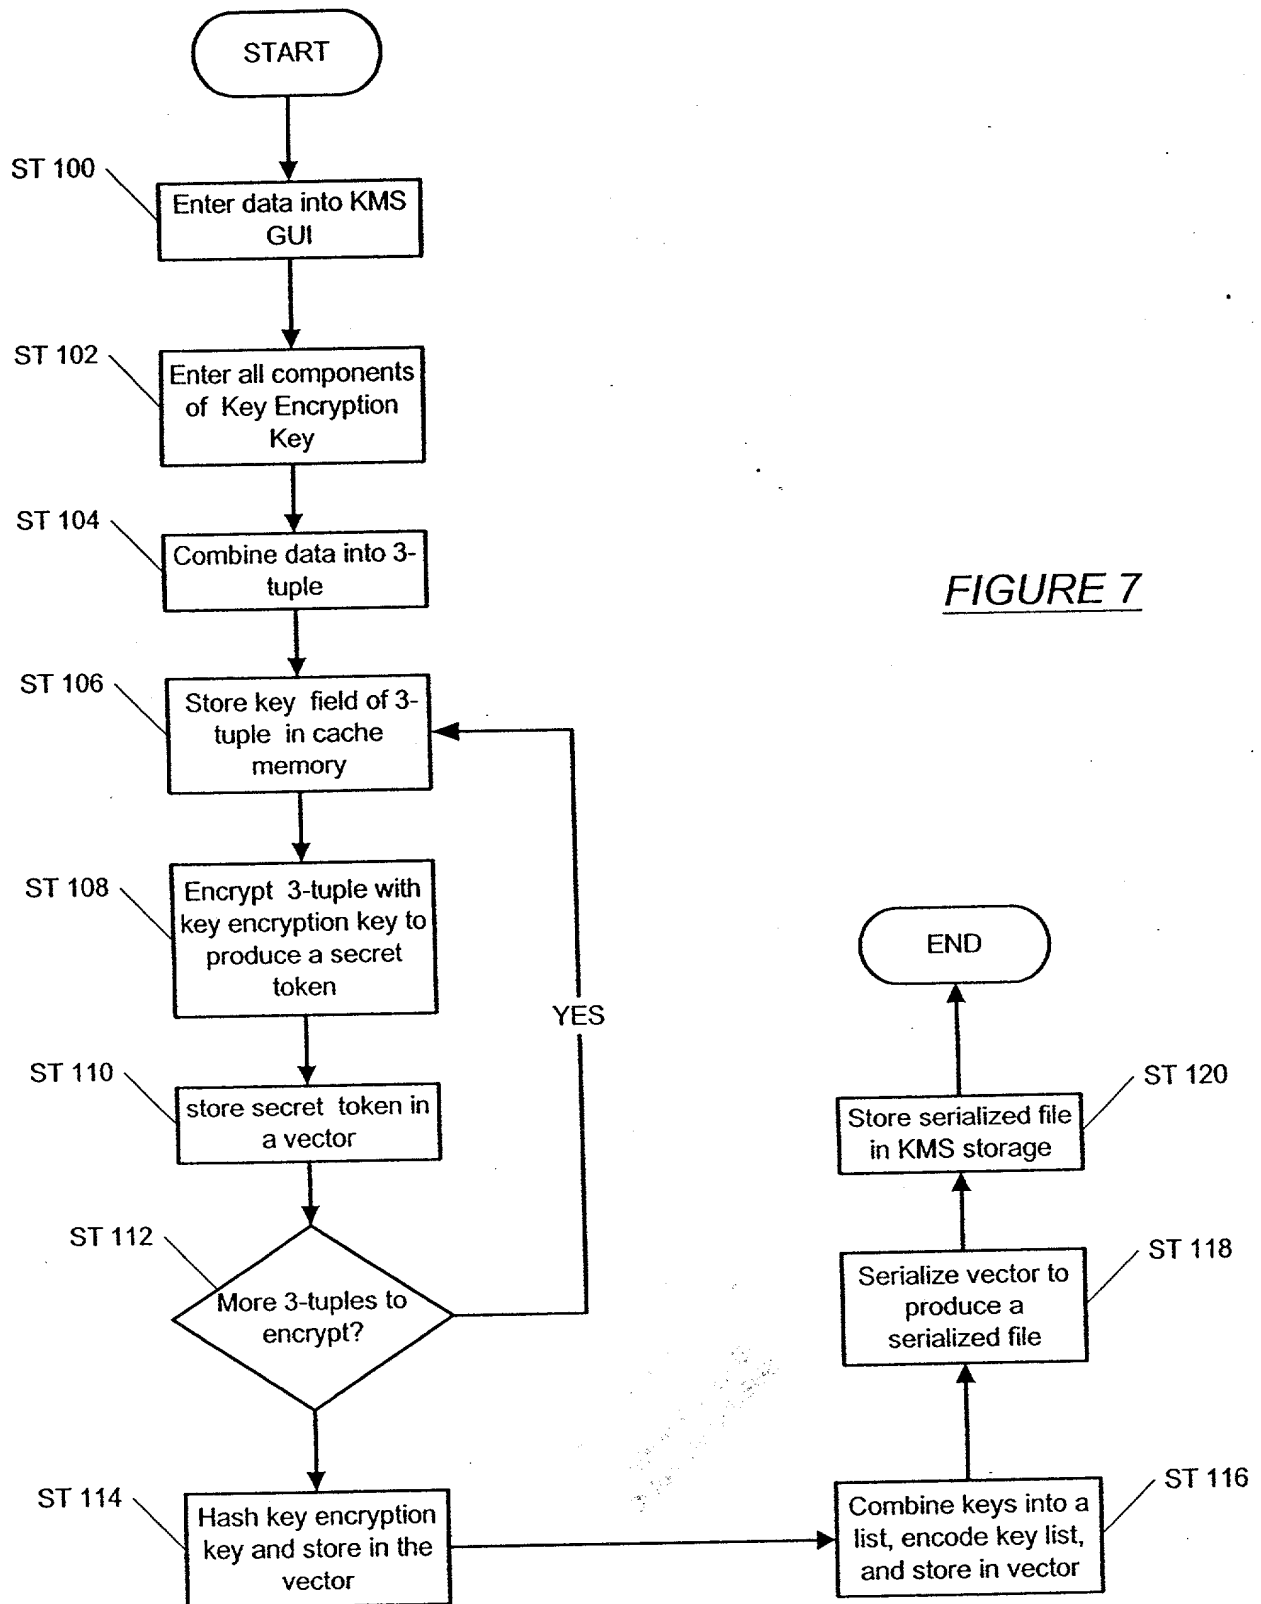

FIG. 8 is a block diagram of a system 800 for processing a request for information. The system 800 includes a processor 802, a memory 804, and a network interface 806. The processor 802 is configured to receive a request for information from a client device 808 and to process the request. The memory 804 stores data and instructions for the processor 802. The network interface 806 is configured to communicate with the client device 808. The client device 808 is configured to send the request for information to the processor 802.
